

CERTIFICATE OF COMMENDATION

Awarded to

CCL LABEL SOUTH AFRICA (PTY) LTD

This commendation serves to confirm that a successful trial was conducted at Extrupet's Wadeville recycling plant on 28th October 2022, in order to:

Validate the suitability of CCL EcoFloat™ floatable polyolefin labels (as per spec sheet) on a PET bottle for the effective recycling of a clear and light blue PET bottle back to "PhoenixPET®" Extrupet's "food grade" rPET.

For the interest of clarity this validation refers to CCL's Low Density Polyolefin shrink film for shrink sleeves labels and tamper evident applications.

Extrupet would like to commend CCL and their team in South Africa for making this drive towards sustainable PET packaging a reality.

23rd November 2022
